

I enthusiastically support satellite radio's ability to broadcast weather and traffic reports across the nation. The fact that the NAB is trying to stifle satellite radio's ability to continue to provide these services to their listeners is unlawful and goes against the first amendment and free speech. What the NAB is trying to do is prevent competition through legislation and this is patently wrong. Do not listen to them or their lobbyists on this crucial issue. Allow satellite radio (both XM and Sirius) to provide local content. Thank you for your time....

Sincerely,

--Kevin Tucker--
